
Baktolan[®] cream

Protective care for dry, stressed skin

Product properties

Dry and stressed skin in particular needs protection and daily care. Baktolan[®] cream is designed for these specific skin requirements:

- stabilises the physiological protective acid mantle
- protects against drying out
- noticeably smooths the skin and keeps it supple
- is absorbed rapidly
- is ideal for care several times a day
- is silicon-free
- is free of preservatives

Areas of application

Baktolan[®] cream is the ideal care for in between times. It can be massaged into the dry hands several times daily without any problem.

It is particularly good after using soaps and wash lotions, after contact with detergents and disinfectants, when the hands have to be washed frequently, and when carrying out jobs where there is frequent contact with water.

Baktolan[®] cream cares for the hands of staff and patients, especially for those with a sebostatic skin, i.e. a dry skin with few natural oils

- in all hospital areas and medical practices
- in residential and nursing homes
- in industrial kitchens
- in cleaning services
- in industry and laboratories

Direction for use

Depending on how dry the skin on the hands is, squeeze out an amount of cream the size of a pea to a hazelnut, and massage it carefully into the hands, paying special attention to the areas between the fingers and the nail beds. After use, make sure that the tube is closed again in order to prevent the cream from drying out.

Baktolan[®] cream

Protective care for dry, stressed skin

Composition

Aqua, Mineral Oil, Petrolatum, Paraffinum liquidum, Ozokerite, Glycerin, Glyceryl Oleate, Lanolin Alcohol, Microcrystalline Wax, Montan Wax, BHT, Ascorbyl Palmitate, Glyceryl Stearate, Citric Acid, Propylene Glycol, Magnesium Sulfate, Parfum.

Characteristics

Baktolan[®] cream was developed specially for dry and greatly stressed skin. The cream, based on a water-in-oil emulsion, lastingly supports the natural regeneration of the skin.

Lanolin Alcohol, a highly effective skin-care substance from dermatological research, penetrates into the upper layers of the stratum corneum and supports the maintenance and formation of the hydrolipid mantle. Transdermal water loss is reduced, water-binding capacity is increased.

So that cared-for hands not only look good, but are also protected, the numerous ingredients support the protective function of the stratum corneum in order to prevent the penetration of harmful substances.

Baktolan[®] lotion

Moisturising care for normal skin

Product properties

Baktolan[®] lotion cares for the skin with selected care components. It penetrates rapidly without leaving a troublesome greasy film and is thus suitable for the whole body-care and the care of stressed hands:

- increases the moisture content of the skin
- cares with vegetable oils and Panthenol
- keeps the skin smooth and supple
- pleasant cool feeling on the skin

Areas of application

Baktolan[®] lotion is used for both mild care of the whole body as well as for hands. Baktolan[®] lotion is suitable especially in daily use for patients and personnel with normal skin constitution.

- in all areas of hospitals and medical practices
- in the area of housekeeping and cleaning services
- in industry and laboratories
- in all areas where quick adsorption without the formation of a greasy film is especially important

Direction for use

Baktolan[®] lotion can be applied on skin and body several times a day. Baktolan[®] lotion is easily spread and thus is absorbed quickly without leaving a greasy film. This is particularly important in office work, working in laboratories etc..

For the hygienic application Baktolan[®] lotion should be dispensed by a Eurodispenser or by a dosing pump. For these, 350 ml bottles are available. Bottles with 100 ml contents make the care of skin and hands possible even when regularly changing work places.

Baktolan® lotion

Moisturising care for normal skin

Characteristics

Baktolan® lotion is a high-quality oil-in-water emulsion specially adapted to the pH value of the skin. In its formulation special attention was paid to very good skin tolerance (without fragrance mixture IS 19) and quick absorption of the lotion. The high quality component Panthenol achieves smoothing of the skin, ensures its moisture content and supports cell regeneration.

Composition

Aqua, Dicaprylyl Ether, Glyceryl Stearate, Cetearth-20, Glycerin, Coco-Caprylate/Caprates, Pentyleneglycol, Octyldodecanol, Panthenol, Cetyl Alcohol, Cetearth-12, Cetearyl Alcohol, Hexyldecanol, Hexyldecyl Laurate, Cetyl Palmitate, Carbomer, Phenoxyethanol, Parfum, Methyl dibromoglutaronitril, Sodium Citrate.
