Laboratory organization system SmartRack®

Better Basics Laborbedarf. Material: aluminium powder-coated, aluminium anodized slotted rails, plastic (polyamide 12).

Modular organization system for any laboratory accessories and laboratory glassware. The wide array of different modules of the organization system can be set up in **any arrangement, combined** and used flexibly. Can adapt whenever and however the user requires. Plastic elements are temperature resistant, can be washed with mild cleaning agents or alcohol-based disinfectants. These are also resistant to chemicals and UV.

Delivery incl. frame, feet (1 pair), 3 slotted rails with side handles, collecting tray.

Advantages:
- The modular design means users can adapt the system to suit their needs
- All modules can be combined in any quantity and any position
- 10% more efficiency thanks to one-handed operation and allows for optimised work processes
- Increases safety when working thanks to tilt protection
- 80% space savings thanks to improved use of workspace at height
- Creates a neater working environment with more free workspace
