acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: **0739** Version: **GHS 6.0 en** Replaces version of: 2022-12-21 Version: (GHS 5)

date of compilation: 2017-09-19 Revision: 2024-03-04

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

### 1.1 Product identifier

Identification of the substance

Article number

CAS number

### **1.2** Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses:

Uses advised against:

Laboratory chemical Laboratory and analytical use

MS, Non-stabilised

0739

109-99-9

Do not use for products which come into contact with foodstuffs. Do not use for private purposes (household). Food, drink and animal feedingstuffs.

Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-

### 1.3 Details of the supplier of the safety data sheet

Carl Roth GmbH + Co. KG Schoemperlenstr. 3-5 D-76185 Karlsruhe Germany

**Telephone:**+49 (0) 721 - 56 06 0 **Telefax:** +49 (0) 721 - 56 06 149 **e-mail:** sicherheit@carlroth.de **Website:** www.carlroth.de

Competent person responsible for the safety data Department Health, Safety and Environment sheet:

### e-mail (competent person):

|                | lenses, if present and easy to do. Continue rinsing                             |
| P312           | Call a POISON CENTER or doctor/physician if you feel unwell                     |
| P370+P378      | In case of fire: Use sand, carbon dioxide or powder extinguisher for extinction |

### **Precautionary statements - storage**

| P403+P233 | Store in a well-ventilated place. Keep container tightly closed |
|-----------|---|
| P403+P235 | Store in a well-ventilated place. Keep cool                     |

### **Precautionary statements - disposal**

| P501 | Dispose of contents/container to industrial combustion plan | ۱t |
|------|---|----|
| FJUI | Dispose of contents/container to industrial compustion plat | ιι |

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

For professional users only

### Supplemental hazard information

AUH019 May form explosive peroxides.

### 2.3 Other hazards

### Results of PBT and vPvB assessment

According to the results of its assessment, this substance is not a PBT or a vPvB.

### **Endocrine disrupting properties**

Does not contain an endocrine disruptor (ED) at a concentration of  $\ge 0,1\%$ .

### **SECTION 3: Composition/information on ingredients**

### 3.1 Substances

| Name of substance | Tetrahydrofuran                     |
|-------------------|-------------------------------------|
| Molecular formula | C₄H <sub>8</sub> O                  |
| Molar mass        | 72.11 <sup>g</sup> / <sub>mol</sub> |
| CAS No            | 109-99-9                            |

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

### **General notes**

Take off contaminated clothing.

#### **Following inhalation**

Provide fresh air. In all cases of doubt, or when symptoms persist, seek medical advice.

#### Following skin contact

Rinse skin with water/shower.

#### Following eye contact

Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. In case of eye irritation consult an ophthalmologist.

### **Following ingestion**

Rinse mouth with water (only if the person is conscious). In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

### 4.2 Most important symptoms and effects, both acute and delayed

Following inhalation: Cough, Dyspnoea, Headache, Vertigo, Drowsiness, Dizziness, Narcosis, Following skin contact: Localised redness, oedema, pruritis and/or pain, After eye contact: Irritation, Following ingestion: Nausea, Vomiting

### 4.3 Indication of any immediate medical attention and special treatment needed

none

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: 0739

### SECTION 5: Firefighting measures

### 5.1 Extinguishing media

### Suitable extinguishing media

co-ordinate firefighting measures to the fire surroundings! water spray, alcohol resistant foam, dry extinguishing powder, BC-powder, carbon dioxide (CO<sub>2</sub>)

#### Unsuitable extinguishing media

water jet

### 5.2 Special hazards arising from the substance or mixture

Combustible. In case of insufficient ventilation and/or in use, may form flammable/explosive vapourair mixture. Solvent vapours are heavier than air and may spread along floors. Places which are not ventilated, e.g. unventilated below ground level areas such as trenches, conduits and shafts, are particularly prone to the presence of flammable substances or mixtures. Vapours are heavier than air, spread along floors and form explosive mixtures with air. Vapours may form explosive mixtures with air.

### Hazardous combustion products

In case of fire may be liberated: Carbon monoxide (CO), Carbon dioxide (CO<sub>2</sub>)

#### 5.3 Advice for firefighters

In case of fire and/or explosion do not breathe fumes. Fight fire with normal precautions from a reasonable distance. Wear self-contained breathing apparatus.

### **SECTION 6: Accidental release measures**

### 6.1 Personal precautions, protective equipment and emergency procedures

#### For non-emergency personnel

Use personal protective equipment as required. Avoid contact with skin, eyes and clothes. Do not breathe vapour/spray. Avoidance of ignition sources.

#### 6.2 Environmental precautions

Keep away from drains, surface and ground water. Retain contaminated washing water and dispose of it.

### 6.3 Methods and material for containment and cleaning up

### Advice on how to contain a spill

Covering of drains.

#### Advice on how to clean up a spill

Absorb with liquid-binding material (sand, diatomaceous earth, acid- or universal binding agents).

#### Other information relating to spills and releases

Place in appropriate containers for disposal. Ventilate affected area.

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: 0739

### 6.4 Reference to other sections

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incompatible materials: see section 10. Disposal considerations: see section 13.

### **SECTION 7: Handling and storage**

### 7.1 Precautions for safe handling

Provision of sufficient ventilation. Avoid exposure.

### Measures to prevent fire as well as aerosol and dust generation

Take precautionary measures against static discharge. Due to danger of explosion, prevent leakage

of vapours into cellars, flues and ditches.

### Advice on general occupational hygiene

Wash hands before breaks and after work. Keep away from food, drink and animal feedingstuffs. When using do not smoke.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed.

### Incompatible substances or mixtures

Observe hints for combined storage.

### Protect against external exposure, such as

high temperatures, UV-radiation/sunlight, contact with air/oxygen

#### Consideration of other advice:

Ground/bond container and receiving equipment.

### **Ventilation requirements**

Use local and general ventilation.

#### Specific designs for storage rooms or vessels

Recommended storage temperature: 15 - 25 °C

### 7.3 Specific end use(s)

No information available.

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: 0739

# **SECTION 8: Exposure controls/personal protection**

### 8.1 Control parameters

### **National limit values**

### **Occupational exposure limit values (Workplace Exposure Limits)**

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: 0739

### 8.2 Exposure controls

### Individual protection measures (personal protective equipment)

### Eye/face protection

Use safety goggle with side protection.

### Skin protection

### hand protection

Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. The times are approximate values from measurements at 22 ° C and permanent contact. Increased temperatures due to heated substances, body heat etc. and a reduction of the effective layer thickness by stretching can lead to a consider-able reduction of the breakthrough time. If in doubt, contact manufacturer. At an approx. 1.5 times larger / smaller layer thickness, the respective breakthrough time is doubled / halved. The data apply only to the pure substance. When transferred to substance mixtures, they may only be considered as a guide.

### • Splash protection - Protective gloves

- type of material: Butyl caoutchouc (butyl rubber)
- material thickness: 0,7mm
- breakthrough times of the glove material:

>10 minutes (permeation: level 1)

### other protection measures

Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended.

Flame-retardant protective clothing.

#### **Respiratory protection**

Respiratory protection necessary at: Aerosol or mist formation. Type: A (against organic gases and vapours with a boiling point of > 65 °C , colour code: Brown).

#### **Environmental exposure controls**

Keep away from drains, surface and ground water.

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

### article number: 0739

## **SECTION 10: Stability and reactivity**

### 10.1 Reactivity

It's a reactive substance. Risk of ignition. Vapours may form explosive mixtures with air. May form explosive peroxides.

### If heated

Risk of ignition.

### 10.2 Chemical stability

The material is stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

### 10.3 Possibility of hazardous reactions

Violent reaction with: strong oxidiser, Alkali hydroxide (caustic alkali), Acids

### 10.4 Conditions to avoid

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. UV-radiation/sunlight.

### **10.5** Incompatible materials

Rubber articles, different plastics, tin

### 10.6 Hazardous decomposition products

Hazardous combustion products: see section 5. Peroxides.

### **SECTION 11: Toxicological information**

### **11.1** Information on toxicological effects

### Classification acc. to GHS

### Acute toxicity

Harmful if swallowed.

GHS of the United Nations, annex 4. May be harmful in contact with skin.

| Acute toxicity |          |                                      |         |        |        |
|----------------|----------|--------------------------------------|---------|--------|--------|
| Exposure route | Endpoint | Value                                | Species | Method | Source |
| oral           | LD50     | 1,650 <sup>mg</sup> / <sub>kg</sub>  | rat     |        | ECHA   |
| dermal         | LD50     | >2,000 <sup>mg</sup> / <sub>kg</sub> | rat     |        | ECHA   |

### Skin corrosion/irritation

Shall not be classified as corrosive/irritant to skin.

### Serious eye damage/eye irritation

Causes serious eye irritation.

### Respiratory or skin sensitisation

Shall not be classified as a respiratory or skin sensitiser.

### Germ cell mutagenicity

Shall not be classified as germ cell mutagenic.

### Carcinogenicity

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: 0739

Suspected of causing cancer.

### **Reproductive toxicity**

Shall not be classified as a reproductive toxicant.

### Specific target organ toxicity - single exposure

May cause respiratory irritation. May cause drowsiness or dizziness.

### Specific target organ toxicity - repeated exposure

Shall not be classified as a specific target organ toxicant (repeated exposure).

#### Aspiration hazard

Shall not be classified as presenting an aspiration hazard.

### Symptoms related to the physical, chemical and toxicological characteristics

### • If swallowed

vomiting, nausea

### • If in eyes

Causes serious eye irritation

### • If inhaled

Irritation to respiratory tract, cough, Dyspnoea, headache, vertigo, drowsiness, dizziness, narcosis

### • If on skin

Prolonged or repeated contact with skin or mucous membrane result in irritation symptoms such as redness, blistering, dermatitis, etc

### Other information

none

### **11.2 Endocrine disrupting properties**

Does not contain an endocrine disruptor (ED) at a concentration of  $\ge 0,1\%$ .

### **SECTION 12: Ecological information**

### 12.1 Toxicity

Shall not be classified as hazardous to the aquatic environment.

| Aquatic toxicity (acute) |                                    |         |        |                  |
|--------------------------|------------------------------------|---------|--------|------------------|
| Endpoint                 | Value                              | Species | Source | Exposure<br>time |
| LC50                     | 2,160 <sup>mg</sup> / <sub>l</sub> | fish    | ECHA   | 96 h             |
| EC50                     | 1,930 <sup>mg</sup> / <sub>l</sub> | fish    | ECHA   | 96 h             |

### 12.2 Persistence and degradability

Theoretical Oxygen Demand: 2.441 <sup>mg</sup>/<sub>mg</sub> Theoretical Carbon Dioxide: 2.441 <sup>mg</sup>/<sub>mg</sub>

acc. to Safe Work Australia - Code of Practice

### Tetrahydrofuran ROTISOLV® ≥99,9 %, Ultra LC-MS, Non-stabilised

article number: 0739

| Process of degradability |                  |      |
|--------------------------|------------------|------|
| Process                  | Degradation rate | Time |
| biotic/abiotic           | 39 %             | 28 d |
| oxygen depletion         | 39 %             | 28 d |

### 12.3 Bioaccumulative potential

Does not significantly accumulate in organisms.

| n-octanol/water (log KOW) | 0.45 (pH value: 7, 25 °C) (ECHA) |  |
|---------------------------|----------------------------------|--|
|                           | -                                |  |

### 12.4 Mobility in soil

Data are not available.

**12.5 Results of PBT and vPvB assessment** Data are not available.

### **12.6** Endocrine disrupting properties Does not contain an endocrine disruptor (ED) at a concentration of $\ge 0,1\%$ .

### 12.7 Other adverse effects

Data are not available.

### **SECTION 13: Disposal considerations**

### 13.1 Waste treatment methods

This material and its container must be disposed of as hazardous waste. Dispose of contents/container in accordance with local/regional/national/international regulations.

### Sewage disposal-relevant information

Do not empty into drains.

### Waste treatment of containers/packagings

Only packagings which are approved (e.g. acc. to the Dangerous Goods Regulations) may be used. Handle contaminated packages in the same way as the substance itself. Completely emptied packages can be recycled.

### Relevant provisions relating to waste(Basel Convention)

### Properties of waste which render it hazardous

H3 Flammable liquids

H11 Toxic (Delayed or chronic)

### 13.3 Remarks

Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities. Please consider the relevant national or regional provisions. Non-contaminated packages may be recycled.
