## Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

#### **Product identifier** 1.1

Identification of the substance Sodium deuterium oxide 40 % solution in D<sub>2</sub>O,

99,5 Atom%D

1K3N Article number

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses: Laboratory chemical

Laboratory and analytical use

Uses advised against: Do not use for squirting or spraying. Do not use

for products which come into direct contact with the skin. Do not use for products which come into contact with foodstuffs. Do not use for private

purposes (household).

#### 1.3 Details of the supplier of the safety data sheet

Carl Roth GmbH + Co KG Schoemperlenstr. 3-5 D-76185 Karlsruhe Germany

Telephone:+49 (0) 721 - 56 06 0 Telefax: +49 (0) 721 - 56 06 149 **e-mail:** sicherheit@carlroth.de Website: www.carlroth.de

Competent person responsible for the safety data :Department Health, Safety and Environment

sheet:

e-mail (competent person): sicherheit@carlroth.de

#### 1.4 **Emergency telephone number**

Name	Street	Postal code/city	Telephone	Website
NSW Poisons Information Centre Childrens Hospital	Hawkesbury Road	2145 West- mead, NSW	131126	

# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

#### Classification acc. to GHS

Section	Hazard class	Cat- egory	Hazard class and category	Hazard statement
2.16	Substance or mixture corrosive to metals		Met. Corr. 1	H290
3.2	Skin corrosion/irritation		Skin Corr. 1A	H314
3.3	Serious eye damage/eye irritation	1	Eye Dam. 1	H318

For full text of abbreviations: see SECTION 16

Australia (en) Page 1 / 13

acc. to Safe Work Australia - Code of Practice

# ROTH

#### Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

article number: 1K3N

# The most important adverse physicochemical, human health and environmental effects

Skin corrosion produces an irreversible damage to the skin; namely, visible necrosis through the epidermis and into the dermis.

#### 2.2 Label elements

Labelling

Signal word Danger

**Pictograms** 

GHS05

## **Hazard statements**

H290 May be corrosive to metals

H314 Causes severe skin burns and eye damage

## **Precautionary statements**

# **Precautionary statements - prevention**

P260 Do not breathe dusts or mists P280 Wear eye protection/face protection

#### **Precautionary statements - response**

P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin

with water or shower

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact

lenses, if present and easy to do. Continue rinsing

P390 Absorb spillage to prevent material damage

# **Precautionary statements - disposal**

P501 Dispose of contents/container to industrial combustion plant

**Hazardous ingredients for labelling:**Sodium deuteroxide

#### 2.3 Other hazards

# Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

# **SECTION 3: Composition/information on ingredients**

## 3.1 Substances

not relevant (mixture)

Molecular formula NaOD

Molar mass 41 g/mol

#### 3.2 Mixtures

Australia (en) Page 2 / 13

acc. to Safe Work Australia - Code of Practice

#### Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

article number: 1K3N

### **Description of the mixture**

Name of sub- stance	Identifier	Wt%	Classification acc. to GHS	Pictograms	Notes
Sodium deuteroxide	CAS No 14014-06-3	40	Met. Corr. 1 / H290 Skin Corr. 1A / H314 Eye Dam. 1 / H318		

For full text of abbreviations: see SECTION 16

## **SECTION 4: First aid measures**

## 4.1 Description of first aid measures

#### **General notes**

Take off immediately all contaminated clothing. Self-protection of the first aider.

#### Following inhalation

Provide fresh air. In all cases of doubt, or when symptoms persist, seek medical advice.

#### Following skin contact

After contact with skin, wash immediately with plenty of water. Immediate medical treatment required because corrosive injuries that are not treated are hard to cure.

## Following eye contact

In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist. Protect uninjured eye.

#### Following ingestion

Rinse mouth immediately and drink plenty of water. Call a physician immediately. If swallowed danger of perforation of the esophagus and the stomach (strong corrosive effects).

# 4.2 Most important symptoms and effects, both acute and delayed

Corrosion, Cough, Breathing difficulties, Gastric perforation, Risk of serious damage to eyes, Risk of blindness

## 4.3 Indication of any immediate medical attention and special treatment needed

none

# **SECTION 5: Firefighting measures**

#### 5.1 Extinguishing media

#### Suitable extinguishing media

co-ordinate firefighting measures to the fire surroundings water spray, alcohol resistant foam, dry extinguishing powder, BC-powder, carbon dioxide (CO<sub>2</sub>)

## Unsuitable extinguishing media

water jet

Australia (en) Page 3 / 13

acc. to Safe Work Australia - Code of Practice

## Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

article number: 1K3N

Non-combustible.

### **Advice for firefighters**

onable distance. Wear self-contained breathing apparatus. Wear full chemical protective clothing.

# For non-emergency personnel

Use personal protective equipment as required. Avoid contact with skin, eyes and clothes. Do not breathe vapour/spray.

#### 6.2 **Environmental precautions**

Keep away from drains, surface and ground water.

#### Methods and material for containment and cleaning up 6.3

### Advice on how to contain a spill

Covering of drains.

#### Advice on how to clean up a spill

Absorb with liquid-binding material (sand, diatomaceous earth, acid- or universal binding agents).

## Reference to other sections

patible materials: see section 10. Disposal considerations: see section 13.

# SECTION 7: Handling and storage

#### Precautions for safe handling 7.1

Handle and open container with care. Clear contaminated areas thoroughly.

#### Advice on general occupational hygiene

Wash hands before breaks and after work. Keep away from food, drink and animal feedingstuffs.

## **Incompatible substances or mixtures**

Observe hints for combined storage.

#### Consideration of other advice:

#### 7.3 Specific end use(s)

No information available.

Australia (en) Page 4 / 13

# 5.3

In case of fire and/or explosion do not breathe fumes. Fight fire with normal precautions from a reas-

# **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

## Other information relating to spills and releases

Place in appropriate containers for disposal.

## 6.4

Hazardous combustion products: see section 5. Personal protective equipment: see section 8. Incom-

#### 7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly closed. Keep only in original container.

## Specific designs for storage rooms or vessels

Recommended storage temperature: 15 – 25 °C

acc. to Safe Work Australia - Code of Practice

#### Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

article number: 1K3N

# SECTION 8: Exposure controls/personal protection

#### 8.1 **Control parameters**

#### **National limit values**

#### Occupational exposure limit values (Workplace Exposure Limits)

Cou ntr y	Name of agent	CAS No	Identi- fier	TW A [pp m]	TWA [mg/ m³]	STE L [pp m]	STEL [mg/ m³]	Ceil ing- C [pp m]	Ceil- ing-C [mg/ m³]	Nota- tion	Source
AU	sodium hydroxide	1310-73- 2	WES						2		WES

#### **Notation**

Ceiling-C STFI

**TWA** 

Ceiling value is a limit value above which exposure should not occur

Short-term exposure limit: a limit value above which exposure should not occur and which is related to a 15-minute period (unless otherwise specified)

Time-weighted average (long-term exposure limit): measured or calculated in relation to a reference period of 8 hours time-weighted average (unless otherwise specified)

#### 8.2 **Exposure controls**

# **Individual protection measures (personal protective equipment)**

## **Eye/face protection**

Use safety goggle with side protection. Wear face protection.

#### Skin protection

#### hand protection

Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374. Check leak-tightness/impermeability prior to use. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. The times are approximate values from measurements at 22 ° C and permanent contact. Increased temperatures due to heated substances, body heat etc. and a reduction of the effective layer thickness by stretching can lead to a considerable reduction of the breakthrough time. If in doubt, contact manufacturer. At an approx. 1.5 times larger / smaller layer thickness, the respective breakthrough time is doubled / halved. The data apply only to the pure substance. When transferred to substance mixtures, they may only be considered as a guide.

#### type of material

NBR (Nitrile rubber)

material thickness

≥0,3 mm

breakthrough times of the glove material

>480 minutes (permeation: level 6)

# ROTH

#### Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

article number: 1K3N

## other protection measures

Take recovery periods for skin regeneration. Preventive skin protection (barrier creams/ointments) is recommended.

# **Respiratory protection**

Respiratory protection necessary at: Aerosol or mist formation. P2 (filters at least 94 % of airborne particles, colour code: White).

# **Environmental exposure controls**

Keep away from drains, surface and ground water.

# **SECTION 9: Physical and chemical properties**

## 9.1 Information on basic physical and chemical properties

Physical state liquid

Colour colourless
Odour odourless

Melting point/freezing point not determined

Boiling point or initial boiling point and boiling

range

101 °C

Flammability non-combustible
Lower and upper explosion limit not determined
Flash point not determined
Auto-ignition temperature not determined
Decomposition temperature not relevant

pH (value) 14 (in aqueous solution:  $400 \, ^{9}$ /<sub>1</sub>,  $20 \, ^{\circ}$ C)

Kinematic viscosity not determined

Solubility(ies)

Water solubility miscible in any proportion

Partition coefficient

Partition coefficient n-octanol/water (log value): not relevant (inorganic)

Vapour pressure not determined

Density  $1.46 - 1.56 \, {}^{9}/_{cm^{3}}$  at 20 °C

Relative vapour density information on this property is not available

Australia (en) Page 6 / 13

acc. to Safe Work Australia - Code of Practice

#### Sodium deuterium oxide 40 % solution in D<sub>2</sub>O, 99,5 Atom%D

article number: 1K3N

Particle characteristics not relevant (liquid)

Other safety parameters

Oxidising properties none

9.2 Other information

Information with regard to physical hazard

classes:

Corrosive to metals category 1: corrosive to metals

Other safety characteristics:

Miscibility completely miscible with water

# **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

Substance or mixture corrosive to metals.

#### 10.2 Chemical stability

The material is stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

### 10.3 Possibility of hazardous reactions

**Exothermic reaction with:** Acids,

**Violent reaction with:** Aluminium, Metals, Ammonium compounds, Nitriles, Nitro compound, Organic substances, Phenols, Strong acid

#### 10.4 Conditions to avoid

There are no specific conditions known which have to be avoided.

#### 10.5 Incompatible materials

different plastics, metals, aluminium, zinc, tin

# 10.6 Hazardous decomposition products

Hazardous combustion products: see section 5.

# **SECTION 11: Toxicological information**

# 11.1 Information on toxicological effects

Test data are not available for the complete mixture.

#### **Classification procedure**

The method for classification of the mixture is based on ingredients of the mixture (additivity formula).

#### Classification acc. to GHS

#### **Acute toxicity**

Shall not be classified as acutely toxic.

#### Skin corrosion/irritation

Causes severe skin burns and eye damage.

#### Serious eye damage/eye irritation

Causes serious eye damage.

Australia (en) Page 7 / 13

acc. to Safe Work Australia - Code of Practice

## Sodium deuterium oxide 40 % solution in D<sub>2</sub>O , 99,5 Atom%D

article number: 1K3N

#### Carcinogenicity

Shall not be classified as carcinogenic.

Shall not be classified as a reproductive toxicant.

## Specific target organ toxicity - repeated exposure

Shall not be classified as presenting an aspiration hazard.

causes burns, Causes serious eye damage, risk of blindness

# If inhaled

cough, pain, choking, and breathing difficulties, irritant effects, pulmonary oedema

## • If on skin

causes severe burns, causes poorly healing wounds

#### Other information

Other adverse effects: Circulatory collapse

#### 11.2 Endocrine disrupting properties

None of the ingredients are listed.

# **SECTION 12: Ecological information**

# 12.2 Process of degradability

#### 12.3 Bioaccumulative potential

Data are not available.

# 12.4 Mobility in soil

Data are not available.

Australia (en) Page 8 / 13

Shall not be classified as a respiratory or skin sensitiser.

# **Germ cell mutagenicity**

Shall not be classified as germ cell mutagenic.

#### Reproductive toxicity

## Specific target organ toxicity - single exposure

Shall not be classified as a specific target organ toxicant (single exposure).

Shall not be classified as a specific target organ toxicant (repeated exposure).

# **Aspiration hazard**

# Symptoms related to the physical, chemical and toxicological characteristics

#### If swallowed

If swallowed danger of perforation of the esophagus and the stomach (strong corrosive effects)

#### If in eyes

#### 12.1 Toxicity

Shall not be classified as hazardous to the aquatic environment.

## **Biodegradation**

The methods for determining the biological degradability are not applicable to inorganic substances.

Data are not available.

acc. to Safe Work Australia - Code of Practice

# ROTH

#### Sodium deuterium oxide 40 % solution in D<sub>2</sub>O, 99,5 Atom%D

article number: 1K3N

## 12.5 Results of PBT and vPvB assessment

Data are not available.

#### 12.6 Endocrine disrupting properties

None of the ingredients are listed.

#### 12.7 Other adverse effects

Data are not available.

# **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

This material and its container must be disposed of as hazardous waste. Dispose of contents/container in accordance with local/regional/national/international regulations.

## Sewage disposal-relevant information

Do not empty into drains.

## Waste treatment of containers/packagings

Only packagings which are approved (e.g. acc. to the Dangerous Goods Regulations) may be used.

## Relevant provisions relating to waste(Basel Convention)

## Properties of waste which render it hazardous

**H8** Corrosives

#### 13.3 Remarks

Waste shall be separated into the categories that can be handled separately by the local or national waste management facilities. Please consider the relevant national or regional provisions.
