

HARTMANN

Baktolin® sensitive

Mild and nourishing washing lotion for the gentle cleansing.

Advantages at a glance

- Cleanses with a soft, creamy foam
- Mild washing lotion with a skin neutral pH-value of 5.5, free from colorants
- Has a fine scented formula
- Contains oil-restoring and nourishing substances
- Excellent skin tolerability
- Contains skin-mild tensides
- Free of soap and parabens

Application

Baktolin® sensitive is suitable as a mild and nourishing washing lotion for the gentle cleaning of skin and hands. The product's skin care substances – allantoin and wheat protein – keep the skin smooth and pliable even with intensive and repeated daily use. The pH value of 5.5 preserves the sensitive protective acid mantle of the skin.

Baktolin® sensitive

Areas of application

Baktolin® sensitive is suitable for the use in the following areas:

- In all hospital areas and medical practices / centers
- In nursing homes
- Suitable for home nursing
- In industry and laboratories

Directions for use

Using a dispenser or a bottle with mounted pump distribute sufficient amount of Baktolin® sensitive on to hands or skin, foam up with water and rinse thoroughly. Hands or skin should be dried off thoroughly.

Usage properties

Baktolin® sensitive cleanses the skin thoroughly yet gently. The skin-friendly pH value preserves the skin's natural acid mantle. Special plant components such as wheat proteins ensure that the skin is smoothed. The allantoin contained in Baktolin® sensitive also helps to keep the skin moisturized skin and supports the cell regeneration.

Composition

Aqua, Sodium Laureth Sulfate, Coco-Glucoside, PEG-120 Methyl Glucose Dioleate, Glycerin, Glycol Distearate, Allantoin, Hydrolyzed Wheat Gluten, Disodium Laureth Sulfosuccinate, Sodium Chloride, Sodium Benzoate, Propylene Glycol, Sodium Salicylate, Parfum (Fragrance), Sodium Citrate.

Physical and chemical properties

Appearance	off-white, pearlescent
Density	1.04 g/cm ³
pH value	5.5
Shelf life after opening	12 months.

Baktolin® – skin-friendly wash lotions

Frequent hand washing can lead to skin irritation. The skin compatibility of Baktolin® wash lotions was therefore examined by means of an epicutaneous test. In this test, the product is applied to the skin of test persons, mostly on the back, and covered with a patch for 24 hours. After the patch is removed, the condition of the skin is visually assessed over a period of 72 hours.

In independent expert reports, very good to excellent skin tolerance was proven for Baktolin® pure and Baktolin® sensitive [1,2].
